# Madeline Ramos

---

Innovative Web Production Associate collaborating on email marketing campaigns and the restructuring of over 20 client websites. Pursuing a full-stack web developer certification through creating full-stack applications which apply to real-world problems. Passionate about software, learning and developing new skill sets, and always ready to take on a challenge.

## SKILLS:

JavaScript, jQuery, Express.js, React.js, Node.js, HTML5, CSS3, progressive web apps, agile methodology, computer science, database theory, MongoDB, MySQL, Git, WordPress.

## EDUCATION:

**UNC-Chapel Hill - Chapel Hill, NC** July 2022 – Jan. 2023  
Certificate - Full Stack Developer

**Savannah College of Art and Design - Savannah, GA** Sept. 2016 - May 2020  
Bachelor of Fine Arts - Furniture Design

## EXPERIENCE:

**Web Production Associate, Go Fish Digital** Raleigh, NC | Dec. 2021 – Present

- Migrate content from clients' current websites to new staging environments. Ensure one-to-one parity of data and content between the clients' legacy website and the newly built site.
- Develop and populate client web pages using client mock-ups and participate in an iterative process with the client according to their needs and feedback.
- Utilize Google Analytics to retrieve user and competitor data to assist with client requirement meetings.

**Assistant Office Administrator, Go Fish Digital** Raleigh, NC | Sept. 2021 – Dec. 2021

- Assisted HR with the onboarding and training of new employees. Planned and coordinated office events. Managed inventory of office equipment and handled purchase requests for all teams.
- Sourced, built, and designed furniture and accessories for new office space.

## PROJECTS:

**Note Taking Application** JS | API | Express.js | Heroku

- A RESTful API with POST, GET, and DELETE endpoints to allow users to read, create, and remove note entries. The application also contained a UI for users to allow them to make requests to API and save to a database. The Note Taking app was deployed on a cloud application platform called Heroku.

**Weather Dashboard** JS | APIs | Bootstrap

- Frontend application that utilizes a REST API to pull weather data to display to the user. Displays the weather of the entered city and a five-day forecast. Saves recent searches to localStorage for easy access.

**Personal Mixologist** JS | APIs | Bootstrap | jQuery

- Frontend application used to find recipes for various types of cocktails. The application utilized GET endpoint to retrieve recipe data from a third-party vendor. The application was created by a team of three using GIT for version control.
